SKILLS

- Computer Networks and Network Security
- Digital and Analog Communication
- Network troubleshooting
- Embedded Systems
- VLSI Fundamentals
- Telecom Network Fundamentals
- Cybersecurity Fundamentals

PROJECTS

EduNite: Alumni-Student Mentorship Platform (Ongoing)

Currently developing a full-stack mentorship platform connecting students with verified alumni for career support, implementing dashboards, messaging, analytics, and AI resume feedback and mentor recommendations.

File Integrity Checker

Developed a Python-based tool to monitor file integrity by generating and verifying SHA-256 hashes, enabling detection of unauthorized modifications through automated hash comparison and tamper checking.

Augmented Reality Learning Tool for School Students

Developed an AR-based educational application that visualizes complex academic concepts through interactive 3D models in real time, creating a more engaging learning experience for school students.

CERTIFICATIONS

- **Cyber Security Fundamentals:** Udemy
- **Computer Networks:** Udemy
